Early Results Presentation

Casey Orton

Review the Research Question & Project Positioning

- This Paper aims to understand the effect that Unemployment Insurance has on the Unemployment rate.
- The Paper analyzes the effect that North Carolina Unemployment Insurance (UI) Policy Change.
- The Policy cuts UI down from 26 weeks to a maximum of 20 weeks and a minimum of 12 weeks based on Unemployment Rate.
- This Policy was a controversial purely political decision by the North Carolina Governor.

Presentation of the Research Methodology

- Found the Unemployment Rate of North Carolina.
- Found a state with similar unemployment rate before the policy change with similar demographics, South Carolina.
- Compared the Unemployment Rate of North Carolina and South Carolina from 2001-2020.
- Assessed the unemployment rate before and after the policy change.

Presentation of Raw Data

Period	State	Mean	Median	Max	Min
2001-2008 (Pre-Recession)	NC	5.89	5.70	9.6	4.4
	SC	6.73	6.90	9.4	4.1
2008-2013 (Pre-Policy)	NC	9.24	9.80	11.4	5.2
	SC	9.48	9.65	12.1	6.0
2013-2020 (Policy Change)	NC	5.54	5.15	14.2	3.8
	SC	5.10	5.05	11.8	2.4

Difference in Differences

```
Call:
lm(formula = Unemployment_Rate ~ Treatment + Post + Treatment:Post,
    data = df_long_filtered)

Residuals:
    Min      1Q  Median      3Q     Max
-3.9056 -1.5882 -0.5882  1.3994  4.1143

Coefficients:
               Estimate Std. Error t value Pr(>|t|)

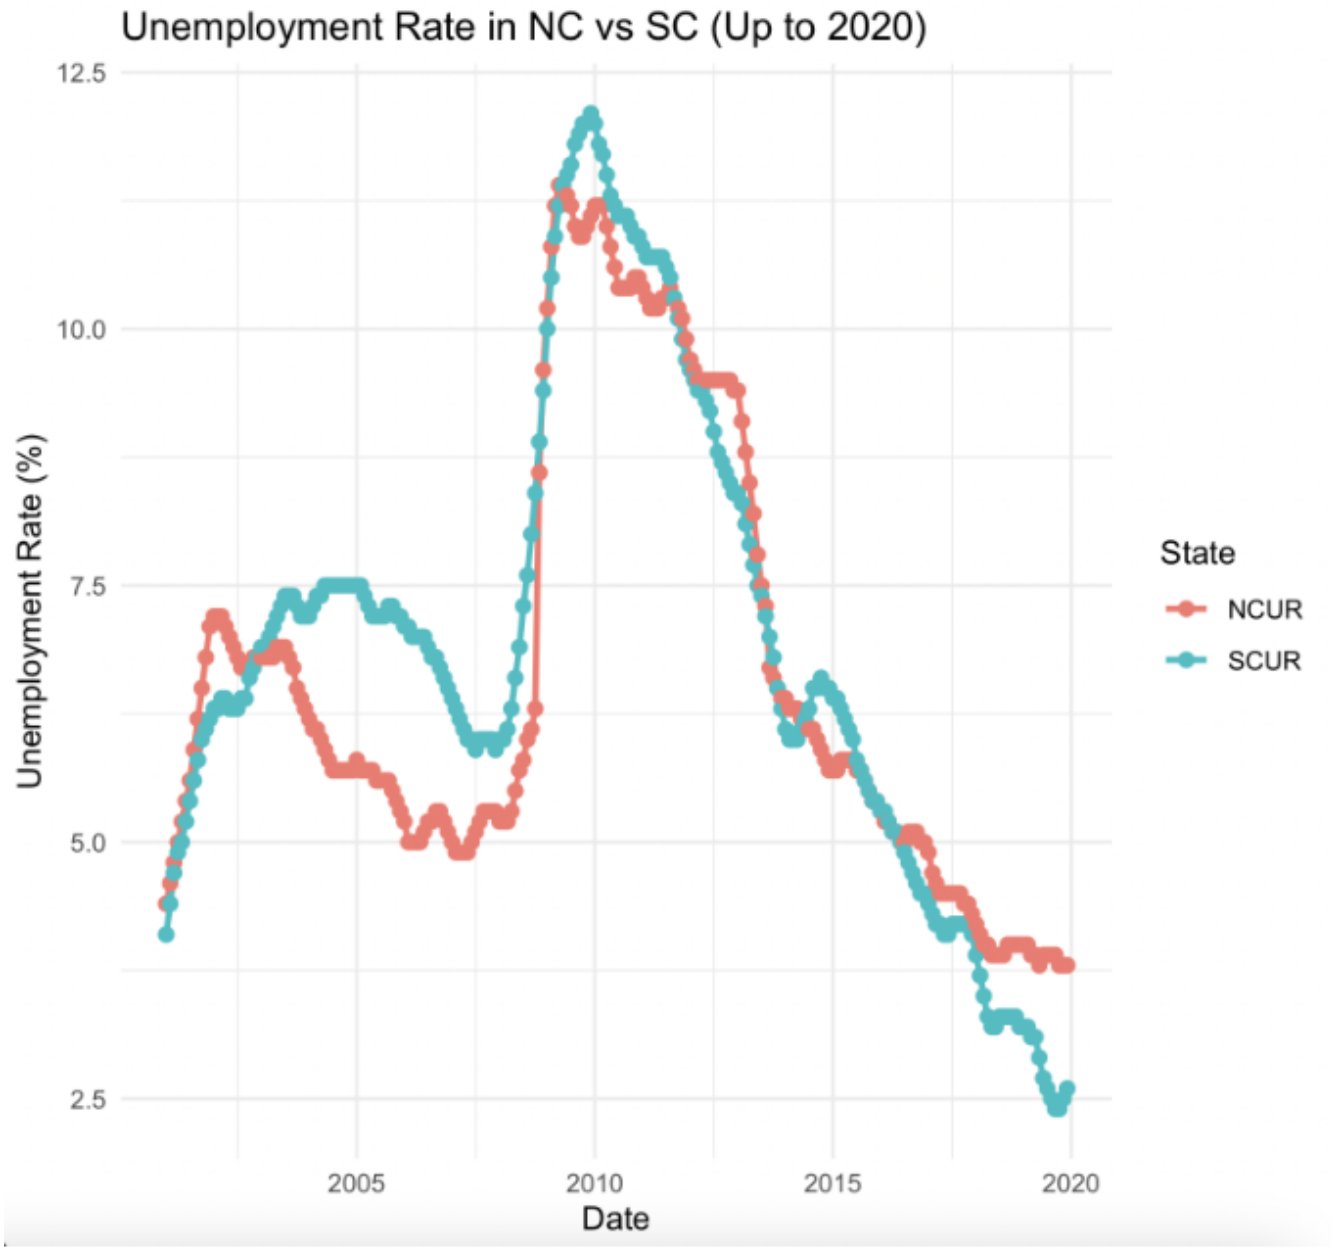
Residual standard error: 1.926 on 452 degrees of freedom
Multiple R-squared:  0.3031,  Adjusted R-squared:  0.2985
F-statistic: 65.53 on 3 and 452 DF,  p-value: < 2.2e-16
```

Wilcoxon Test

```
    Wilcoxon rank sum test with continuity correction

data:  Unemployment_Rate by Post
W = 9540, p-value = 3.563e-13
alternative hypothesis: true location shift is not equal to 0
 A tibble: 2 × 5
  Post Median  Mean   Min   Max
 <dbl>  <dbl> <dbl> <dbl> <dbl>
     0    6.7  7.39   4.4  11.4
     1    5.1  5.29   3.8   9.4
```

Presentation of Early Results: Time Series



Conclusion

- Hurdle 1: Need to analyze more states to compare to North Carolina.
- Hurdle 2: Other states must have comparable Unemployment Rates.
- Conclusion so far: There seems to be little impact of the policy change on Unemployment Rates in North Carolina.
